## INSTRUCTIONS.

---

All applications for apparatus are to be made on Science Form No. 49, which will be supplied on application to the Secretary, Science and Art Department, South Kensington.

The prices given in the right-hand column are the highest on which the aid of 50 per cent. is given. The applicant is at liberty to select a higher-priced article, but the aid towards the purchase of it will be only 50 per cent. of the price in the right-hand column. Should a lower-priced article be selected the aid will be only to the extent of 50 per cent. of its price. No aid is given on those articles to which no such price is attached.

Apparatus grants are rigorously confined to articles of a permanent and non-destructible nature; hence no aid is afforded in the purchase of breakable articles, such as glass retorts, test tubes, &c., or indeed generally in the purchase of articles to be used by the student as distinguished from those of a permanent and illustrative character which are required by the teacher in giving instruction in science. To such articles no prices are affixed in the right-hand column; the articles are mentioned simply to assist teachers in their selection.

N.B.—In filling up No. 49, the number of the apparatus must always be mentioned.
